

Vulnerability Management Policy

(Last Updated February 2026)

Purpose

The Vulnerability Management Policy of **Phour Global Limited** aims to establish a systematic and proactive approach for identifying, assessing, prioritizing, and remediating vulnerabilities within the organization's technology infrastructure. This policy aims to provide clear guidelines and procedures for monitoring, analyzing, and mitigating vulnerabilities to reduce the risk of exploitation and unauthorized access. By implementing effective vulnerability management practices, this policy seeks to enhance the security and resilience of systems operated by **Phour Global Limited**, protect sensitive information, and maintain compliance with industry standards and regulatory requirements. Through vulnerability scanning, penetration testing, and vulnerability remediation processes, **Phour Global Limited** strives to identify and address security weaknesses in a timely manner, minimize potential threats, and safeguard the confidentiality, integrity, and availability of data and networks. By prioritizing vulnerability management, **Phour Global Limited** actively manages risk, improves its overall cybersecurity posture, and ensures the trust and confidence of its stakeholders.

Scope

The Vulnerability Management Policy applies to all employees, contractors, and stakeholders of **Phour Global Limited** and encompasses the proactive identification, assessment, prioritization, mitigation, and monitoring of vulnerabilities within the organization's

IT infrastructure. This policy covers all systems, applications, network devices, and endpoints operated by **Phour Global Limited** that may be vulnerable to security flaws and weaknesses. It establishes guidelines for vulnerability scanning, penetration testing, risk assessment, and remediation processes. The policy sets forth procedures for vulnerability reporting, tracking, and patch management to ensure timely and effective resolution of identified vulnerabilities. It also defines the roles and responsibilities of individuals involved in vulnerability management processes. Compliance with this policy is mandatory for all individuals within **Phour Global Limited**, and any deviations or exceptions require approval from the designated authority responsible for vulnerability management and cybersecurity governance.

Safeguards

To achieve the overall mission of **Phour Global Limited**, and the purpose of this cybersecurity policy, the organization shall:

VUL-01 Maintain a Vulnerability Management (VM) system to detect and track weaknesses in the information systems of **Phour Global Limited**.

VUL-02 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** uses agents and/or authenticated scans to detect weaknesses in the organization's information systems.

VUL-03 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** scans for weaknesses caused by outdated, vulnerable software, based on CVEs.

VUL-04 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** scans for weaknesses caused by software misconfigurations, based on CCEs.

VUL-05 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** scans

for open, dangerous network ports or services.

VUL-06 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** prioritizes the vulnerabilities it detects in its information systems.

VUL-07 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** compares the results of consecutive vulnerability scans to track the progress of remediation efforts over time.

VUL-08 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** tracks open vulnerabilities in the organization's information systems.

VUL-09 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** tracks approved exceptions when vulnerabilities are discovered on the organization's information systems.

VUL-10 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** reports discovered vulnerabilities to the organization's technical staff regularly.

VUL-11 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** regularly reports discovered vulnerabilities to the organization's business unit staff.

VUL-12 Ensure the Vulnerability Management (VM) system of **Phour Global Limited** reports discovered vulnerabilities to the organization's business leadership staff regularly.

Policy Sanctions

Non-compliance with this policy may result in disciplinary action in line with the human resources procedures of **Phour Global Limited**. Consequences may range from mandatory refresher training and written warnings to temporary suspension of remote access privileges and, in severe cases, termination of employment or contractual obligations. Individuals may be

subject to legal consequences under applicable laws if violations involve illegal activities. These sanctions emphasize the critical importance of cybersecurity, the individual's role in protecting the digital assets of **Phour Global Limited**, and the potential risks associated with policy violations. Enforcement will be consistent and impartial, with the severity of the action corresponding directly to the seriousness of the breach.
